

For industrial progress

COORDINATOR

ABOUT US

Our innovative team is focused in coordinating and collaborating closely with electrical technology european producers, to represent them and facilitate their access to the spanish industrial market.

Our aim is to be present in competitive projects and segments by bringing our knowledge to find out new business opportunities. We are fully committed to ease and give the best possible connections.

All the sectors integrating the industrial environment need to be related and optimized. In collaboration with our customers, we give solutions to satisfy their needs, **emphasizing the personal treatment** to create long term commercial relations.

We propose a large range of cables and complementary components for fixation, installation, connection, insulation, protection and identification of electrical systems and infrastructures.

By ensuring a single reliable source per product, we guarantee the highest quality standards and compliance with the actual existing regulations. Moreover, we provide our technical knowledge and responsiveness for special demands.

We apply transparency and clarity in our work relations to create a close and pleasant atmosphere.

We bring products, services and solutions.
